Employment History

Support Engineer – Reactive Accelerator Batch 2

Learn with Sumit | Oct 2024 – Feb 2025

- Provided technical support and mentorship to students learning advanced frontend development with React and Next.js.
- Assisted in debugging, optimizing code, and improving project architecture.

Support Engineer – Reactive Accelerator Batch 3

Learn with Sumit | Apr 2024 – Aug 2025

- Guided learners through complex concepts such as Redux, Next.js API routes, and server-side rendering.
- Helped in project review, troubleshooting, and performance improvements.

Education

Higher Secondary Certificate (HSC) – Dinajpur Govt. City College

Completed: 2023

Professional Courses & Certifications

Think in a Redux Way – Learn with Sumit

Reactive Accelerator – Learn with Sumit

Projects (Available on Portfolio)

Safe House – Property Management Platform

A modern, feature-rich real estate platform built using Next.js, TypeScript, Tailwind CSS, and deployed on Linux servers via Coolify. It enables users to browse, search, and manage property listings through a sleek and responsive interface.

Geo Speedometer

A fast, minimalistic offline speedometer built purely with HTML, CSS, and JavaScript—perfect for quick, reliable performance without internet dependency.

Portfolio Website & Admin Dashboard

A custom portfolio created with Next.js, TypeScript, Tailwind CSS, and Prisma. It not only showcases work but also includes an admin dashboard for seamless content management.

Additional Information

Strong understanding of authentication systems (JWT, OAuth).

Experienced in performance optimization and SEO best practices.

Open to learning new technologies and contributing to innovative SaaS projects.
